

1) Strategy: the goal of the movement and the movement strategy that best achieves the goal.

"What angle should I shoot for to achieve desired speed?"

2) Tactics: the sequence of movements, arranged in space and time, required to achieve the strategic goal.

"How fast should I move my wheels to achieve desired angle?"

3) Execution: activation of the motors that generate the goal-directed movement and make necessary posture adjustments

"How should I activate my motors to achieve desired speed?"
